# MARKER BOARDS

FPL ARE THE LARGEST MANUFACTURER OF CV MARKER BOARDS IN THE UK.

The range includes ECE70, ECE70/1 and BS AU152 approved boards which are all made in the UK.

As all boards are custom printed we offer the facility to include customer logos FOR FREE.

We also supply ADR and hazchem markers and panels, abnormal load markers and a wide range of specialist warning markers and signage.

We welcome any customer enquiries for special items and can also supply products for the Irish and continental markets.

In addition to marker boards we also have ECE-104 conspicuity tape available in red, amber and white from manufacturers such as 3M and Avery.

#### The GHS is an acronym for The Globally Harmonized System of Classification and Labelling of Chemicals.

The GHS is a system for standardising and harmonising the classification and labelling of chemicals. It is a logical and comprehensive approach to:

- Defining health, physical and environmental hazards of chemicals;
- Creating classification processes that use available data on chemicals for comparison with the defined hazard criteria; and
- Communicating hazard information, as well as protective measures, on labels and Safety Data Sheets (SDS).

For more information on this legislation, which came into effect in the UK & European Economic Area on 20th January 2009, please visit;

### COUNTERFEIT VERSIONS OF ECE104 CERTIFIED TAPE ARE CIRCULATING

These products consistently fail multiple visibility tests. Supplying these products are putting lives at risk every day across the UK. Protect yourself, your company and fellow road users by only buying legitimate products from trusted sources.

## What to look out for...

#### **FAKE:**

The 'E' marking features a black overprint, which will wear off easily.

#### **REAL:**

Only ECE104 approved tape has an embedded, indelible 'E' mark that cannot be removed.

### ALSO, DID YOU KNOW?...

**FAKE** ECE104 tape has a rough unsealed edge.

**REAL** ECE104 tape has a smooth sealed edge.

### ARE YOU WORRIED ABOUT YOUR ECE104 CONSPICUITY TAPE?

We will test it for **FREE** to make sure your tape is authentic, fit for purpose and safe.

- Standard strip kits
- Flooded kits
- Fitting option available
- Engineering grade
- Edge Sealed micro prismatic
- New vehicles added regularly

Standard Strip Kits

Flooded Kits

### Engineering Grade Chevron Kits

These kits are a combination of yellow fluorescent non-reflective material and a reflective red that primarily uses crushed glass beads for reflectivity. These kits are the most cost-effective.

### Prismatic Grade Chevron Kits

The red material used has a far higher reflectivity value compared to engineering grade and is known as the 'gold standard' by the highways and civil engineering industries covered by Chapter 8.

### Edge-Sealing of Prismatic material

In order to ensure the maximum life span of your conspicuity markings (up to 10 years), we edge seal layered micro-prismatic material with an ultra-sonic weld during the cutting process.

### Replacement Panel Service

If you have purchased a kit from FPL and your vehicle is involved in a minor collision you can choose to order only the panels of a kit that were damaged, saving time and money during repairs and downtime.

## Chevron Kits • Chapter 8 Compliant • Emergency Services Options

### Emergency service battenburg kits also available

In addition to a large stock profile, we can offer chevron kits in engineering and Micro-Prismatic materials from 3M, Avery Dennison and Rennicks Nikkalite.

# WHEEL NUT INDICATORS & TORQUE CLIPS

Wheel Nut Indicators (WNI) are a visual safety aid to highlight loosening wheel nuts. They give the driver an early indication that the wheel nuts need to be addressed. Wheel nut indicators are used extensively by the transport industry to enhance fleet safety.

**APPLICATION:** The WNI is applied to the wheel nut by gripping the six corners of the hexagon nut with the WNI teeth and positioned in alignment with each other in a recognized pattern and fitted in a way that the WNI is allowed to rotate freely should the wheel nut become loose, this is normally anti clockwise direction. When a wheel nut becomes loose the WNI will turn with the nut and break the pattern visibly identifying a safety hazard. The wheel nut must be torqued to the recommended value before fitting the WNI and checked in accordance with CPC legislation and a qualified CPC driver and should be of a tight fit.

WNI also provide an indication of overheating wheels, which is not always obvious to see, this can be the result of brakes sticking or problems with the bearings, WNI are designed with **predetermined melting points** to draw attention towards a problem which needs to be addressed before it becomes serious.

WNI provide a clear visual commitment to road worthiness and professionalism to other road users, showing further commitment to health and safety, road and transportation associations such as VOSA, HSE, RHA and FTA.

**MATERIAL:** WNI are manufactured in the highest quality impact copolymer polypropylene offering high stiffness and good impact resistance properties and are resistant to moisture/water, road salt, oil and detergents.

**TEMPERATURE:** The standard WNI material has a melting point of 125°C and our high temperature nylon material is available to order subject to minimum order quantity and can withstand temperatures up to 240°C.

### Pallet Edge Protectors

Pallet edge protectors are an ideal way to ensure your cargo is kept safe, secure and damage free whilst in transit, plus they extend the life of your straps.

- Plastic edge protectors can be used with 50mm and 75mm webbing
- Protects webbing from sharp and abrasive edges - extending strap life
- An opening in the strap slot enables retro fitting of the corner protectors
- Helps to secure your load more safely

Using edge protectors distributes the pressure of straps more evenly resulting in:

- Reduced strap marks on cargo
- Reduced damage from straps squeezing and damaging packaging
- Reduced damage to straps

## Descriptions, illustrations, images and specifications:

This catalogue was correct at the time of going to print. However due to the continuous nature of product development the right is reserved to change the specification of the items, illustrations and descriptions in this publication at any time.

## FPLUK CUSTOMER RETURNS POLICY

1. Customers must notify us to request the return of any goods clearly stating the reason for the return request. This can be by phone or email (sales@freightproducts.co.uk) to the sales office or direct to the sales manager responsible for the customer. If there is a genuine reason for the return (i.e. wrong product sent, items faulty or damaged, wrong product ordered but items are re-saleable) then a returns number from FPL together with a returns collection form will be issued. This number will be unique for that particular return and will enable identification of the

customer and the products to be returned. Products returned without quoting this returns number will not be authorised and the goods will not be eligible for credit or FOC replacement. Please note that returns of items which are not faulty or incorrectly supplied will incur a 20% restocking fee.

2. Items manufactured to order and supplied correctly will not be eligible for return. Items requiring modification due to customer error will incur a modification charge.

3. If electrical items fail within the guarantee period we reserve the

right to repair the product and return rather than replace the item foc.

4. When the return arrives at the FPL warehouse it will be checked off against the returns form and any discrepancies noted. If the items returned are damaged or do not match the returns form then the customer will be notified stating the return is not as notified and a credit note may not be issued.

5. If the returned items match the authorised returns request and if new are in re-saleable condition a credit note or will be issued less any restocking fees (if incurred).

IN SUPPORT OF STOCK ORDERS WE CAN OFFER BRANDED OR WHITE LABEL POSTERS/POS DISPLAYS FOR CERTAIN PRODUCT LINES

## POSTERS & FLYERS

**WARNING!**  
Beware Of Fake And Unsafe Illegal ECE104 Conspicuity Tape!

COUNTERFEIT VERSIONS OF ECE104 CERTIFIED TAPE ARE CIRCULATING. These products consistently fail multiple visibility tests. Supplying these products are putting lives at risk every day across the UK. Make sure you are not a part of the problem!

**What to look out for...**

**FAKE:** The 'E' marking features a black overprint, which will wear off easily.

**REAL:** Only ECE 104 approved tape has an embossed invisible 'E' mark that cannot be removed.

**ALSO, DID YOU KNOW?...**

**FAKE** ECE104 tape has a rough unsealed edge.  
**REAL** ECE104 tape has a smooth sealed edge.

**ARE YOU WORRIED ABOUT YOUR ECE104 CONSPICUITY TAPE?**  
We will test it for FREE to make sure your tape is authentic, fit for purpose and safe.

The 'E' marking features a black overprint, which will wear off easily.

### REAL:

Only ECE104 approved tape has an embedded, indelible 'E' mark that cannot be removed.

## ALSO, DID YOU KNOW?...

**FAKE** ECE104 tape has a rough unsealed edge.

**REAL** ECE104 tape has a smooth sealed edge.

### ARE YOU WORRIED ABOUT YOUR ECE104 CONSPICUITY TAPE?
